Abstract—Main theme of your assignment or academic projects.

n

Index Terms—The word mostly used in your report.

I. INTRODUCTION

Classroom management is defined as the methods and strategies an educator uses to maintain a classroom environment that is conducive to student success and learning.

II. LITERATURE REVIEW

An important part of classroom management is respect. Before any instruction begins, a mutual amount of respect must be developed between student and teacher. Students must understand that there are certain rules that they must follow to ensure their success. Similarly, instructors must understand that students are not necessarily willing to give respect to an instructor without feeling they have reason. Setting guidelines for the classroom will help develop the respect that is needed so students can do their best.
